

# SAP ON AZURE

## SAVE COSTS AND ACCELERATE DIGITAL TRANSFORMATION BY MOVING SAP APPLICATIONS TO MICROSOFT AZURE

From lower total cost of ownership to increased agility, migrating your ERP environment to the public cloud offers many benefits.

But digital transformation with SAP on Microsoft Azure is no easy feat.

It is a complex transition that requires strategic planning, roadmap development, DevOps capabilities, and a deep understanding of Azure.

At Core BTS, we understand the complex nature of migrating SAP apps to Azure.

Our first-hand experience with one of Microsoft's largest SAP on Azure migrations, coupled with our delivery methodology and robust set of migration tools, means that we have the depth and breadth of expertise required to support your ERP transition. Learn more about our methodology below.

## OUR METHODOLOGY

We help you prepare for the ever-changing SAP landscape by using first-hand experience, best practices, and Secure DevOps automation.

- Determine Azure governance and architecture strategy
- Build out foundational Azure components
- Develop SAP environment utilizing an established deployment methodology
- Run testing to determine SAP environment stability and security
- Calibrate and iterate the SAP environment
- Deliver Azure As-Is documentation and begin migrations

By following our methodology, you can experience seamless and repeatable migrations into a secure and optimized Azure environment. Let's get started today!
